-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claim 6 is objected to because of the following informalities: The meaning of the phrase "on a first computer of the at least one computer," in lines 4-5 is difficult to understand. It is understood as either "on a first computer of the computer system," or "on a first computer from among the at least one computer." Examiner understands both phrases to have the same meaning in the context of this application. The first suggested replacement phrase is recommended as being more easily understood. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Raveis (Pub. No. US 2001/0005829).

Raveis teaches all the limitations of Claims 1-9. For example, Raveis discloses a system and method for facilitating real estate transactions using a computer system comprising at least one database, and allowing navigation between at least one display and two additional displays for displaying information about real estate transactions (see at least Abstract, page 10 para.0102-0105). Raveis further discloses:

- providing a first informational computer screen display for displaying information obtained from a database: (see at least Figs. 1,3-6; page 1 para.0008, page 2 para.0013, page 4 para.0070, page 8 para.0092, page 9 para. 0098) about one or more real properties; a first display being partitioned into a plurality of portions, each portion displaying information about at least a first property (see at least Figs. 3-6, page 1 para.0008, page 9 para.0098-0100, page 10 para.0102-0105).
- allowing navigation by a single user selection from the first display to any one of at least two additional computer screen displays: the additional displays comprising a first additional display comprising information about realty deals facilitated by the computer system and a second additional display comprising information about realty deals facilitated by the computer system, allowing navigation from any of the displays to any other of the displays for providing additional information about at least a first one of the one or more real properties (see at least page 1 para.0008, page 8 para.0091, page 10 para.0102-0105).

Please note: The exact nature of the information provided, not having any

functional impact on the method, is non-functional descriptive matter. Even if the information in the present application's claims differed from Raveis it would therefore not patentably distinguish the claims. In this case, however, the descriptive material in the present application is essentially the same as in Raveis).

- at least one computer: (see at least Abstract, Fig.1, page 1 para.0007, page 3 para.0035-0037, page 4 para.0040).
- at least one database accessible by the at least one computer: the first computer comprises the at least one database (see at least Abstract, page 1-2 para.0012-0013, page 2 para.0018,); database is a relational database (see at least page 3 para.0033).
- first informational computer screen display provided on a first computer: for displaying information obtained from the database (see at least Figs. 1,3-6; page 1 para.0008, page 2 para.0013, page 4 para.0070, page 8 para.0092, page 9 para. 0098).
- at least two additional computer screen displays: a first additional display and a second additional display (see at least page 1 para.0007-0008, page 8 para.0091, page 10 para.0102-0105).
- computer system is a networked computer system: (see at least Abstract, page 1 para.0007-0008, page 2 para.0016-0017, page 3 para.0031-0032, 0034, 0037, page 3-4 para.0038); first computer is a client computer (see at least page 3 para.0035, page 4 para.0040, page 11 para.0115); server computer comprises

the at least one database (see at least page 3 para.0031-33, page 3-4 para.0038).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each listed reference teaches systems, methods, and/or apparatuses for facilitating transactions by aiding the flow of information. Each includes at least one database, a computer, a computer network, a server, at least two navigable computer screen displays, and a relational database. Finally, each specifically notes its applicability to real estate, real property, or realty transactions.

- Rozmanith, US Pat. No. 5,179,652 (January 12, 1993); Method and apparatus for storing, transmitting and retrieving graphical and tabular data. Refers specifically to real estate.
